

## Job Description

---

<b>Job Title:</b>	Sr. UI Engineer / Principal UI Engineer
<b>Job Type:</b>	Product Engineering
<b>Location:</b>	Noida, India

### About CloudSphere

CloudSphere's flagship Cloud Management Platform enables enterprises and cloud service providers to simplify and optimize cloud migration, management, and governance. Our multi-cloud solutions use a unique application centric approach to allow users to see beyond individual cloud resources and manage applications in the cloud.

We are offering candidates an opportunity to join our company, make an impact and be a part of our future success. As a growing company, CloudSphere is an exciting and vibrant place to work and supports employee's ability to develop their skills and careers in a flexible working environment. We offer a wide range of benefits and a competitive salary.

### About the role

You will be part of an Agile team and involved in all aspects of our cloud product's lifecycle from inception through release working closely with the team's product owners, architect, and engineers.

### Key Responsibilities

- Own and deliver complete features, including design, architecture, implementation, testability, debugging, and shipping
- Work closely with other disciplines to shape the product
- Demonstrate the ability to learn quickly, be self-directed, and work well with other people
- Foster a culture of being agile, innovative, team-oriented, and customer-focused
- Create clean well thought out UI designs and code with an emphasis on quality, simplicity, and maintainability
- Responsible for understanding and adapting to new technologies, tools, methods, and processes from industry
- Active participation in Functional Spec, Design and Code reviews. Champion good engineering practices

### Skills and Experience

- A degree or equivalent experience in Engineering, Information Technology, or a related field
- At least 6+ years of hands-on experience in UI development using **ReactJS, JSX, JavaScript Fundamentals + ES6, HTML + CSS, Node + npm, Redux**
- Experiences in web markup, including HTML5, CSS3, TypeScript/JavaScript
- Experiences in advanced JavaScript libraries and frameworks.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Worked with package builders such as webpack, npm.
- Knowledge of node.js
- Knowledge of Spring MVC will be preferable

### To Apply:

Applications will be accepted until the position is filled. Please email your resume to [careers@cloudsphere.com](mailto:careers@cloudsphere.com), include a cover letter, and use the position title in the subject line of your email. Only candidates considered for an interview will be contacted.

Thank you for your interest in this position, we look forward to hearing from you!
